31st October, 2016

**Screenreader:**

- Command + F5: To turn on voiceover
- Click '*turn voiceover on*'
- Press the '*down arrow*' on keyboard to move around on the page
- Control + Option + Command + Right Arrow:  to change voice, adjust volume, rate, pitch and intonation
- Control + Option + Command + h: to move through headings
- Control + Option +Right Arrow: Goes through bottom navigation bar
- Command + F5: Turn off Voiceover

**Issues:**
- Header's weren't identified
- While reading the page, the screen reader mentions each word which can get confusing
- On having multiple tabs open, it's very confusing to navigate
- On having multiple nav bars, I don't know how to access each
